SOL

POPULOUS PROJECTS

the team

we are a small group of senior artist with lot of experience on the field. as we are having more connections our team is constantly getting bigger and we have more capacity. this way we can provide more creativity and keep the quality and flexibility in the same level

because of the lot of experience we can provide high quality images in very short deadline depending on our workload we can produce 6-10 images in 12-14 working days

visuals for Populous

below you can find all the images we made in the last couple year for many different Populous projects most of these images are not published yet, so we can not share them online, but we wanted to collect and share them to present our team's strenght for the architects of all Populous office

drafting

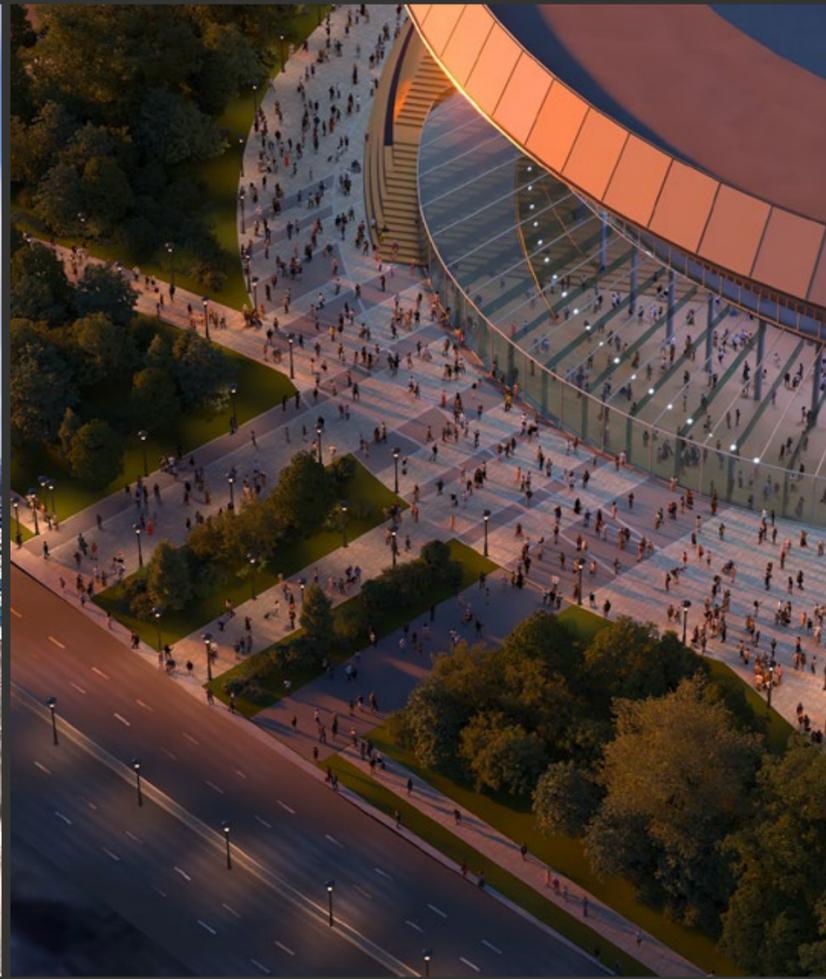

the most exciting part is to explore the possibilities of a project during the first stage with a lot of impressive sketches

we always experiment with a lot of different moods and viewpoints to create eye-catching images

these are a key part of the process, that's why you can find our sketches as well in this collection in front of the final images of every project
